RESEARCH EXPERIENCE

Graduate Researcher Oct 2023 - present
Oregon State University
Advisor: Dr. Rebecca Hutchinson

- Modeled plant–pollinator interactions across a decade of environmental change using hierarchical dynamic occupancy models and probabilistic graphical models in R
- Studied imperfect detection effects in species distribution and occupancy models by simulating detection noise and evaluating model performance across statistical frameworks (linear and hierarchical models)
- Conducted interdisciplinary research on species distribution modeling, demonstrating a 23% performance gain with boosted regression trees (BRTs) when habitat sampling is centered on bird locations rather than surveyor locations

Research Intern June 2024/25 - Sep 2024/25
Micron Technology
Advisor: Seth Eichmeyer, Director of Product Yield Analytics & Analysis

- Awarded the **Micron Innovation Award**, marking the first step toward a patent filing
- Designed, developed, and deployed ML models to optimize product yield through wafer defect analysis
- Built a non-parametric clustering system for wafer defect patterns with rotation- and flip-invariant features, reducing manual analysis time by 90%
- Developed a novel anomaly scoring metric leveraging conditional VAEs, diffusion models, and vision transformers (ViTs) to detect multi-defects and anomalous patterns in semiconductor manufacturing
- Presented project outcomes and business impact to the Vice President of Engineering

Graduate Researcher June 2022 - Jan 2023
UW Bothell: Computation Behavioral Modeling (CBM) Research Lab
Advisor: Dr. Afra Mashhadi

- Defined research around studying nostalgic and reminiscent behavior on social media using natural language processing (NLP) and large language models (LLMs).
- Built traditional NLP classifiers and transformer models (RoBERTa, DistilBERT, ensemble models) to detect nostalgic conversations on Twitter, achieving 0.96 Micro F1-Score.
- Extended the study by leveraging LLaMA2-70B to refine and validate nostalgic tweet detection at scale, resulting in a curated dataset of ≈250K nostalgic English tweets.
